

PHOTO GUIDE for creating a custom 3D avatar

1. PREPARATION

- plain underwear (no decorative details)
- hair up, neck uncovered

2. CAMERA SETUP

- distance 2.5-4 m from the camera
- zoom in to at least 2×
- place the camera at abdomen level (you'll need a tripod or someone to help)

3. POSE

- feet shoulder-width apart
- arms raised out to the sides at a 45-degree angle, shoulders relaxed
- elbows slightly bent, hands relaxed or in loose fists
- stretch up through the top of your head

IMPORTANT: your arms shouldn't touch your body, and your legs shouldn't touch each other - leave a visible gap between your arms and torso, and between your legs

4. PHOTO ANGLES

5. CHECK MEASUREMENTS (in centimeters)

Height =
Bust circumference =
Underbust circumference =
Waist circumference =
Hip circumference =
Upper arm circumference =
Thigh circumference =

IMPORTANT: measure each circumference at its fullest point, keeping the tape parallel to the floor
